The MYP eAssessment is an innovative model for recognizing the academic achievement and personal growth of students in the final years of the MYP.

**Measures what really matters today**
MYP eAssessment helps schools make judgements about students’ development as global learners, their ability to transfer understanding to unfamiliar situations, and their capacity to connect academic study with the world beyond the classroom.

**Measures what really matters today**

- About 200 IB World Schools worldwide registered students for on-screen examinations and ePortfolios.
- 77,000+ personal projects moderated to international standards by the IB.
- 39 subjects offered; top three on-screen examination subjects include interdisciplinary learning, English language and literature, and mathematics.
- The MYP enjoys formal recognition as a national middle level qualification in several countries, including Belgium, Germany, India, Kazakhstan, and Spain.

**Measures what really matters today**

- Awarded Best Use of Summative Assessment and highly commended for Best Transformational Project at the 2018 International e-Assessment Awards.
- 50 years of IB’s expertise and excellence in assessment practice has supported the development, piloting, and successful launch of secure, accessible eAssessments.
- MYP eAssessment is regulated by England’s Office of Qualifications and Examinations Regulation (Ofqual) assuring schools, parents, and students that the MYP eAssessment meet strict quality standards.

**Measures what really matters today**

- Stimulus material and media content generated by eAssessments motivates high-quality, inquiry-based approaches to teaching and learning.
- MYP eAssessment includes:
  - One personal project which is a long-term, independent inquiry
  - Four on-screen examinations in mathematics, sciences, language and literature, and individuals and societies
  - Two ePortfolios of coursework in language acquisition, and arts/design/physical and health education
  - First-in-class on-screen examination focused on interdisciplinary learning

**Measures what really matters today**

- Through the eAssessment, students encountered a familiar interface that offers an engaging digital experience; focuses on real world applications; is rich in multimedia content; and is highly interactive.

**Measures what really matters today**

- eAssessment results provide valuable feedback about contemporary skills and conceptual understandings that can't be garnered from traditional tests.
