¿Cómo crees que serán en el futuro? ¿Por qué?

EVOLUTION OF A WING

I think that the elephant and the bird are going to change because the changes of the environment.

The elephant will have a smaller trunk because there will be less water.

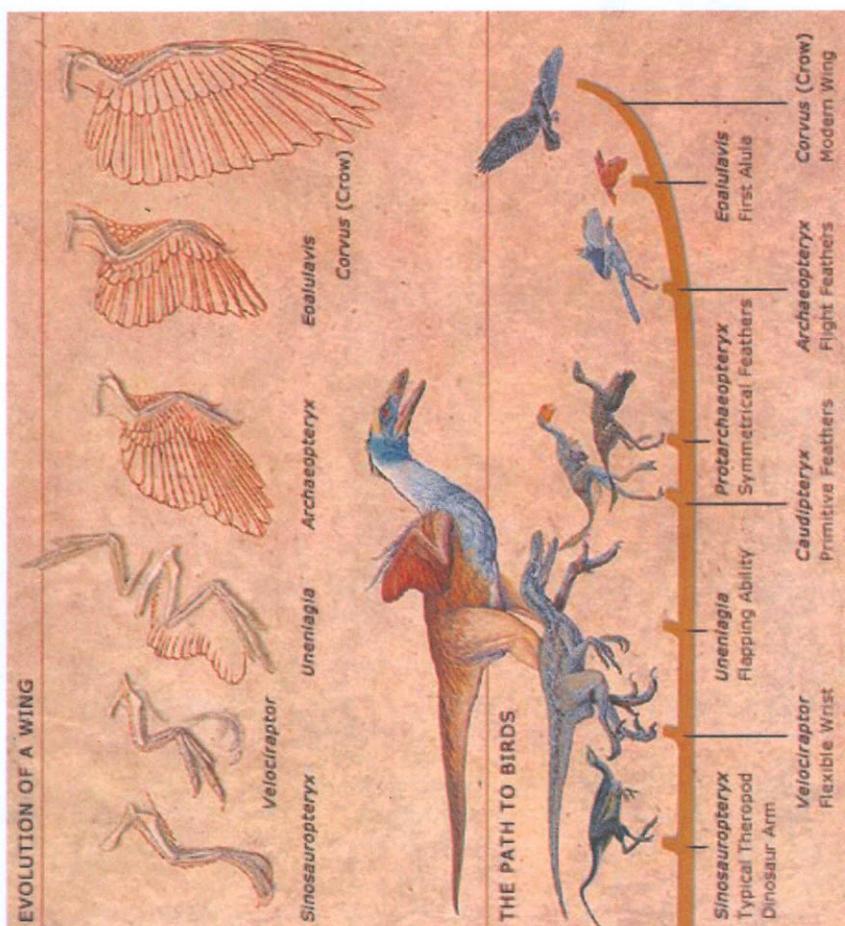

The bird will be smaller because it will have to hide of dangerous animals.

## Interpretación

¿Cómo crees que serán en el futuro? ¿Por qué?

I think elephant will evolves in a more different way I think they will become small and they will have smaller Tusks because now they smallest animals will survive, they will become hairy just for a few years for covering from Glaciation.

The birds will become bigger and with large legs for walking, they will become prey birds. They will need to walk because all they food will be at the earth

Drawing of a long-necked plesiosaur!  
 It has a long neck, a small head,  
 and four flippers. It is swimming  
 in blue water.  
 Scale bar: 10 cm

**Labels:**  
 - long neck  
 - small head  
 - four flippers  
 - blue water  
 - scale bar

Second flipper has about soft,  
 second flipper has rigid  
 rigid ventral flaps on it  
 which help it swim  
 Second flipper has  
 skin folds which help  
 it swim
